

Laboratory work bench with metal frame

→ GENERAL PROPERTIES

- Steel tubes frame
- Steel tubes frame dim. 50x50 i 50x80mm
- Heavy duty RAL 7047, galvanized and epoxy powder coated
- High load capacity 200 kg/m²
- High vibration stability left-right and up-down
- Leveling breaks
- Diagonal stability supports
- According to EN 13150.
- Worktops made of: technical ceramic material, epoxy, HPL, stainless steel, polypropylene or compact, according to laboratory use

Laboratory work bench with metal frame

→ STANDARD WORK BENCH DIMENSIONS

	SEDENTARY WORK	STANDING WORK
hight	750	900
depth	600	600
	750	750
width	900	900
	1200	1200
	1500	1500
	1800	1800
	2100	2100
	2400	2400
	2700	2700
	3000	3000
	3300	3300
	3600	3600

Z- FOOT

massive metal leg of high load capacity gives high stability to worktops and leveling possibility

→ STANDARD WORKTOPS

TECHNICAL CERAMIC MATERIAL

High mechanical and chemical resistance, fireproof.

POLYPROPYLENE

High chemical resistance.

EPOXY

High chemical resistance. Possibility of junctions with no transition (for microbiology).

STAINLESS STEEL

Worktops for demanding mechanical and moisture conditions (wash-rooms).

COMPACT

High mechanical strength and resistance to high temperatures. Good chemical resistance

HPL

Good chemical resistance and economical performance.
